A Delta of .50 or 50 indicates a probability of 50% that the strike price will be in the money at expiration.

In other words...

If you construct a trade around a 50 Delta, you have a statistical 50/50 chance of success.

Part 3. Under Standing Risk

One bad trade wipes out a bunch of winners

It's hard to recover losses

The enemy of any income trader is to take losses that far exceed the average gain.

Risk Management SPX Income Trading Risk:Reward of 1:1

Example:
Win \$1,500 on a winner
Lose \$1,500 on a loser

Risk Management

SPX Income Trading Risk:Reward combined with Probability is how we make money.

How do you make money???

>50% Winners and good risk to reward

Risk Management 60% Winners But...

W W L W L W W W L L W W W W W W

You can still have a string of losers.

In A Typical Year at 60%

32 winners

20 losers

Accept it.

Cardinal Rule

Only risk losing 3% of your total account on each trade

This works!

If we took 50 trades per year it would take 2 years to complete 100 trades.

Trading 1 Contract our account would go from \$5000.00 to \$9875.00 in 2 Years.

In 15 minutes per week.
