# Key Concepts

2. Implement techniques and indicators that are consistent with that market environment.
  - In a trending market use trend-based indicators.
  - In a rangebound market favor neutral oscillators (RSI, Stochastics), support and resistance, candlestick reversal signals.
  - Become defensive in an overbought market and look to go bottom-fishing in an oversold market.
3. Never risk more than 1-2% of your overall portfolio value on any single position.
